IN MEMORIAM

In loving memory of our dear Mother (Mrs. John Burr), who died October 9th, 1922.

In the graveyard softly sleeping,
Where the flowers gently wave,
Lies the one we love so dearly,
In her lonely silent grave.
The flowers we place upon you
May wither and decay,
But the love we bear thee,
Dear Mother, will never fade away.

Some may think we are not lonely,
When at times they see us smile;
Little do they know the heartaches
That we suffer all the while.
Sadly missed by Husband and Family.

President Tory of the University of Alberta, has declined an offer of the chairmanship of the Canadian Scientific Research Council, and will remain as head of the Alberta university.

MANY CASES

Police Have Busy Week End

As a result of a well conducted and organized raid by Const. E. B. Davies, A.P.P., Vulcan, assisted by Sgt. Haddon, Const. Jones and Det. Priestwich on the Savoy Hotel at Champion on Saturday night last, Ed. Lesage was taken in custody and appeared before J. A. Lindsay, J.P., at the Alberta Provincial Police barracks, Vulcan, on Monday, Oct. 1st, in answer to a charge of "Keeping Liquor for Sale." The accused pleaded guilty, as there was nothing else for him to do, being caught with the goods. He received a sentence of six months imprisonment at Lethbridge jail, without the option of a fine. This was his second conviction inside of five weeks. He was taken to Lethbridge on Wednesday morning's train by Const. Davies to serve his term.

G. L. Standish of the Central Billiard Room at Champion, appeared before J. A. Lindsay, J.P., at Vulcan, on October 1st, charged with unlawfully keeping open during prohibited hours. He pleaded "Not guilty." L. H. Stack appeared for the defence, and Sgt. Haddon for the prosecution. Evidence was given by Sgt. Haddon, Const. Davies and Const. Jones, and the Worship found that the case was very clearly proven and imposed a fine of \$25.00 and costs.

Beatrice Hallman was arrested by Const. E. B. Davies on Sunday evening and charged with being a neglected child. She appeared before J. A. Lindsay, J.P., at the barracks on Tuesday, October 2nd. Insp. Munro of the Neglected Children's Department, Calgary, conducted the investigation. After a lengthy hearing she was handed over to the department and made a ward of the government. She left for Calgary on Tuesday night's train in charge of Mrs. Watt.

Alfred Britton, a harvest hand working on a threshing outfit west of Vulcan, was arrested by Const. Davies A.P.P., on Sunday evening late, and he appeared before J. A. Lindsay, J.P., at the barracks on Tuesday, Oct. 2nd, charged with contributing to the neglect of a child. He pleaded guilty and received a fine of \$25.00 and costs.

James Johnson of Stavely was arrested by Const. E. B. Davies, A.P.P., at Kirkaldy on the evening of the 2nd inst., and brought before J. A. Lindsay, J.P., at the police barracks, Vulcan, charged with being intoxicated. He received a fine of \$5.00 and costs.

LOCAL ITEMS

The Ford Motor Company will spend seven million dollars in advertising during the next twelve months.

Writs in connection with the liquor plebiscite will be issued to returning officers about October 9th, giving twenty-seven clear days before voting day.

The Earl and Countess of Stratford who, with their daughters, the Ladies Byng, have been visiting Invermere, have gone to Ottawa, where they will visit Lord and Lady Byng.

Let it be remembered that every dollar spent in patronizing a home enterprise adds to the prosperity of our town and with the growth of our town's prosperity comes the increase in value of real estate.

Messrs. Rebbe and Shimp are making arrangements for a combination auction sale, to be held at Dodd's livery barn, on Saturday, October 20th. If you have anything to sell, list it at once. If you desire to buy, attend the sale.

Inter-club swine judging contests for the boys' and girls' clubs are to be put on in both Calgary and Edmonton this fall. Teams for judging will be made up of three members from each club, the teams being selected from winners at the school fairs.

Accidents will happen with the best of threshing outfits. We have two to report this week. William Carrigan in some manner got his hand caught in some part of the mechanism and is now minus two or three fingers or parts of fingers. Robbie Love, while starting a gas engine, was unfortunately enough to have his foot slip from the fly wheel into the gears, and the result is an injured foot and the loss of a toe or two.

LOCAL ITEMS

Mrs. Simington and Mrs. Wenger were visitors this week in Calgary.

Harvest Thanksgiving services will be held in the Anglican church on Sunday, October 14th.

Miss Mabel McVey, of Ottawa, who is visiting in the west, was recently the guest of Rev. and Mrs. Brunton. A conceited man is one who boasts of his new boy baby and admits grudgingly that his wife was also present.

Messrs. Brunton, Simington, Collier, and Anderson attended a Collier function last week in connection with Ashler lodge, in Calgary. It was a very interesting and enjoyable event.

What do the rest of you business men think of the suggestion to get a little more light on our front street—Broadway if you like? Some have expressed themselves favorably. Let your light so shine that the public, seeing your enterprise, will express appreciation with patronage.

The baseball world's series will start on October 10th, with the two New York teams as contestants. We will go down with the bunch to the D. C. Jones drug store where, with the radio in operation and Billy Recor displaying the plays with rings, it is the next best thing to being at the ball park.

Jimmy Dick has left Vulcan and gone to Camrose. Jimmy was well known and was for a considerable time employed with W. D. Allan. He played first base with the ball team, and was just the kind of a real fellow that a town like this regrets to lose. His going is a distinct loss, and he leaves with the best wishes of many friends.

A local guy has just figured out the thirty-two years of his life as follows: He spent one year waiting in barber shops, two years sleeping, three years looking at movies, one year buttoning a collar, two years playing golf, two years chewing tough beefsteak, eight years dodging bill collectors, one year waiting for his wife to get dressed, two years looking for jobs and eight years working.

Mr. H. W. Reeves, well known as a former merchant here, and in fact one of the oldest old-timers in town, is back in Vulcan for a week or two. Mr. Reeves has some unfinished business in the district and this is receiving his attention. He reports his business good in Armstrong, B. C., and in reply to enquiry of friends tells of the fine health of himself and Mrs. Reeves, and of his business partner, Mr. W. H. Grant, and his family.

Mr. Bennett and Mr. White, principals of the construction company which bears their names, were in town on Tuesday, and on Wednesday a start was made on their contract of constructing the new skating rink, and the progress of the work will be watched with interest by our citizens. The plans of the fine rink have not been seen by many. They are on display in Spooner's window for a few days. Take a look at them and get an idea of the really splendid rink we are going to have.

Eleven thousand Britishers came to Canada this year to assist in harvesting the crops. Many of these men desire to remain if opportunities of winter employment are available to them. Canada needs settlers and assistance in retaining desirable newcomers of sturdy British stock is earnestly solicited. If you require a man this winter for farm work or other employment, kindly furnish particulars to the Soldier Settlement Board, Calgary, or communicate with the Vulcan representative of the board, Geo. A. McTaggart, Phone 121, Vulcan.

Vulcan last week was visited by C.P.R. officials of high rank, and for a day or so the private car was on the siding at this point. They were General Superintendent Cameron and District Supt. McIntosh. The grain hauling facilities at Vulcan and other matters had their attention, and the report is that they made a trip by auto over the survey of the proposed new line from Lomond to Blackie. No information appears to have been given out for publication, but the fact of their visit is taken as an indication of the importance of Vulcan as a centre contributing to C. P. R. business.

Consideration is being given to a proposition for the building of a basement under the Union church building. The plan is to raise the present structure and build a cement lower storey to provide for Sunday school and other required church accommodation. This would also add much to the appearance of what is now a very nice church building. This improvement was all but accomplished some two years ago. This time it has promise of going through, for our information is that the Ladies' Aid have in hand money sufficient for the purpose, and what the ladies undertake they usually accomplish.

LOCAL ITEMS

If you have any news item drop us a line or phone us the information.

The dance on Friday night, under the auspices of the W.A. of St. Aldhelm's church, was an enjoyable and successful event. The attendance was large, the music fine, and the supper just right.

Harvest Thanksgiving services will be held at St. Aldhelm's church on Sunday, October 14th, as follows: 8:00 a.m., holy communion; 11:00 a.m., matins and sermon; 7:30 p.m., evening song and sermon; Preacher, Rev. Canon Gale, of Calgary.

Eunice Victoria, the little daughter of Mr. and Mrs. Fortier, aged three months, died at the family home on Wednesday morning, October 3rd. It is a coincidence that on exactly the same date five years ago the bereaved parents suffered the loss of an infant son. They have the sympathy of many friends.

Mr. Angus Sinclair has disposed of his livery business, which he has operated for some years. Mr. Sinclair will remain in Vulcan at least for a time, until he winds up his business affairs. He has always contributed generously in support of Vulcan and its community enterprises, and is the kind of a citizen that has a welcome to stay.

By permission of the mayor and council, the Dramatic Club will present Freckles Barry, in the picture production of "Penrod" at the Vulcan opera house, on Monday and Tuesday nights, October 8th and 9th, and the proceeds will be in aid of the new skating rink. Music by the Ober orchestra. This should be a sufficient appeal for your patronage.

Mr. "Booley" Ober, our local wireless expert, received a post card the other day which advised the fact that the sender had picked up signals sent out by Mr. Ober. The card was from New York. It is a long way from Vulcan to New York, and this constitutes the distance record thus far achieved by Mr. Ober, of which he is justly proud and Vulcan will be pleased.

The Elliot Family Orchestra, an organization of father and mother, one daughter and five sons, furnished a delightful hour for those who attended the theatre on Monday night. The varied program included everything from fox-trots to opera selections, and all were really good. The favorite was a violin solo by the young lady of the orchestra. The orchestra was quite the equal of the best that has ever appeared here.

The sale of poppies in Vulcan for Armistice Day will this year again be conducted by the Women's Institute, so we have been informed by an official of that institution. It is to be hoped that the success of last year will be repeated and even exceeded. Everybody should buy a poppy and wear it on Armistice day. It is a mark of esteem due the soldier dead, and the proceeds of the sale are certainly devoted to worthy purposes.

The daily papers are devoting much front page space to the movements of the Prince of Wales and the reports of huge crop yields, and The Calgary Herald, on Tuesday, under a big three-column head, prints prominently the sub-head "Vulcan District Sets High Marks," and under this are recorded the remarkable crops harvested by I. Jacobson, J. S. Jamieson and Fred Glass, all of which have previously received mention in The Advocate. O. L. McPherson, speaker of the Alberta legislature, secured 20,000 bushels of Marquis from 500 acres of stubble, an average of 40 bushels to the acre.

There was a meeting of local curlers on Monday night, but there was not a large attendance. Prospects and plans for the coming season were considered, and there was much discussion of the subject of a new curling rink. Generally it is anticipated that this winter will be a great one for sport, and particularly for curling, as increased facilities will afford opportunities for bonspiels of considerable size, and it is in the minds of some that Vulcan will have to provide a Vulcan cup the same as High River has a High River cup, and Okotoks an Okotoks cup. Anyway, Vulcan will surely be in it when it comes to curling.

Extended mention of the school fair will be deferred until the final results are figured out, and the report of the prize winners is completed. Be it sufficient at the present to say that it was an immense success, in some respects not so good as last year, but in many much better. The weather was perfect for such an event, and the hundreds in attendance, both old and young, enjoyed to the limit this annual and ever increasing interesting event. The competition was keen in almost every class, and the athletic events furnished plenty of opportunity for the contestants and real entertainment for the spectators. Vulcan fully sustained its fine record for a school fair, and more will be said of it in future issues.

LOCAL ITEMS

School Inspector McGregor is again in town this week, working out of Vulcan in the district.

Mr. Roy Ferguson is the new proprietor of the Palace livery and sales stables, and as such has been in business for a week, and business has been big. Everybody here knows Roy.

The quarterly communion service will be held in the Union church on Sunday morning at 11 o'clock. Rev. Dr. Heustis will assist at this service, and will also speak at the evening service.

John Hewins, graduate of the Ontario Veterinary college, has located at Vulcan for the practice of his profession in the district. He possesses the qualifications and the experience for successful service.

The Lethbridge Conservatory of Music has established a branch in Vulcan, as announced by an advertisement in this issue. A representative of that institution was in town last week for the purpose.

"The lower you go on the ballot, the wetter it gets," is the way one fellow refers to the coming vote on the liquor question. You get your ballot and you take your choice. There is something in it for everybody.

The Municipal Review of Canada says: "The Smith's Falls council granted a site of 100 feet for a swimming pool." This town is a long way from Vulcan, but they have the same idea, and it appears that they have a little start on us. However, we will be up to them some day.

Wheat records have been engaging the attention of late, and well they might, for indeed they are great, but here is one for oats that will be hard to beat. Mr. J. A. Ruffeldt secured a crop of 116 bushels per acre on a field of 20 acres. These were oats of the Victory variety.

The record of 52 1/2 bushels per acre of number one wheat on 140 acres on the premises of Mr. Fred Glass has been mentioned before in the Advocate and in several of the daily papers that are giving Vulcan district the credit due for great crops. This land is farmed by Mr. Leo Sparke, and to him Mr. Glass is desirous of giving just credit.

Mr. Geo. M. Whicher has been appointed returning officer of the local electoral division in connection with the coming plebiscite on the liquor question. The vote will be taken on November 5th, and in the meantime particulars of the same will be properly published and the other details arranged. Mr. Whicher will make an efficient official.

The Advocate contributed a special prize for the best business letter, to be exhibited in connection with the school fair, and a pupil at the Long Coulee school certainly made a hit with the newspaper man, if not with the judge, when this was submitted: "Please find enclosed the sum of \$2.00, for which send the Advocate to undersigned for one year." This pupil had the right idea.

Members of the Ladies' Aid were in business assembled on Friday last, the first time since the summer holidays. But while they played they paid, for they for the first time introduced the system of a penny-a-day while they were away, and this aggregated the splendid sum of about a hundred dollars. It was a real business session for, besides taking account of the pennies, they discussed the matter of a bazaar, a turkey dinner, and the big undertaking of putting a basement under the church.

There was a strange car in Vulcan on Sunday, and because of its peculiarities created comment. Just what it was was not known until the following appeared in The Lethbridge Herald: "Here is the latest weapon of war in Alberta. It is the high-powered Hudson automobile attached to 'D' division with headquarters at Lethbridge. Capable of 90 to 100 miles an hour and stripped for action at all times, the machine is mounted with a rapid fire machine gun which can spray bullets at the rate of 100 a minute on fleeing bootleggers and rum runners, or border bandits who have been growing so bold during the past few years. The whole combination makes an effective war weapon."

The Advocate, since the school fair, has been several times requested to be sure and not fail to give proper credit to Mr. R. L. Elves for the success of his efforts as secretary of the event. These reminders were not necessary, but the Advocate is pleased with the indication that it is of the appreciation of the work of an efficient official, and particularly is this so when it comes from the teachers and parents of the school districts of a more or less distance from Vulcan, and in this connection it might be noted that one lady urged the more active support of the fair on the part of the country schools and people. Everything is going splendidly, but there is nothing too good for Vulcan district.

Rex

THE VULCAN ADVOCATE

VULCAN, ALBERTA

MILLIONS LAID BARE BY FIRE

Forest fires in Canada during the five years between 1918-1922 laid bare 3,616,000 acres of merchantable timber growing on public-owned lands. The value of this timber, as it stood in the forests, was over 35 million dollars. In addition to this enormous fire-swept area over 4 million acres of young growth was swept out of existence, valued at \$17,921,000. On what are called cut-over lands from which the matured timber has been taken but containing considerable value in young growth, 2,500,000 acres were destroyed by fire with a conservative valuation of \$2,700,000. The Dominion Forestry Branch makes the total of destroyed forests in excess of 10 million acres, with a valuation of \$56,560,000. Added to this is a property loss in excess of \$13,000,000, a cost of fire fighting, \$2,500,000, making a grand total of \$72,806,000 in the five year period. These figures, while bad enough in themselves, are not a complete statement of the economic loss to Canada through forest fires. In the forest industry more than in any other the cost of the manufactured product is made up of labor charges. Hence destruction of present and future timber crops involves direct loss of the means of sustenance of an important part of our population. Soil deterioration following forest fires has never been estimated but decreased production over enormous areas means a great set-back to the future prosperity of Canada. These losses cannot go on indefinitely if Canada's forest industries, accounting for a production of wealth amounting to 500 million dollars a year, are to remain in operation. The present way we are travelling leads to destruction as far as our forest resources are concerned.

JUST EVOLUTION

Italy has her Mussolini, Russia her Lenin, Spain her Primo Rivera and now Bulgaria has broken into the revolutionary trio with leaders as yet unnamed. Don't let all this revolution alarm or depress you. Pessimists see this revolutionary growth and fear the establishment of communism or some similar radical form of political expression in Canada. There are even American leaders who boldly predict revolution unless some economic abuses are remedied. There is nothing to be worried about. All the political upheavals in Italy, Russia, Spain and Bulgaria are just evolution working out according to the differing temperaments and ideals of the people. Evolution does not work like that among the Anglo-Saxon peoples. The French terror could have happened nowhere but in France; Bolshevism could have grown nowhere but in Russia; Fascism is an exclusive product of Italy; only Britain could have produced a Cromwell. Evolution works out among Anglo-Saxons along economic lines, industrial organization has done more for Anglo-Saxons than legions of soldiers. We can't catch a disease to which we are not susceptible.—Vancouver Sun.

TELL-TALE DISCLOSURES

From the fact that President Daly had over two thousand shares in the Home Bank we agreed that his personal interest in it would shield him from any charge of negligence in management. It also happens however that he was president of a pulp and paper company which secured large loans from the bank. It has also transpired that during the past few months he had sold \$90,000 worth of his holdings through a Toronto broker. These disclosures should be sufficient to justify investigation and prosecution, says the Kincardine Review.

WELCOME CHANGES

A wedding used to be a terrible thing for a family of small means but large pretensions, says Forbes Magazine. In the strain to make a show such as custom demanded, the father of the bride not infrequently courted bankruptcy. It is different today. Now the young people are likely to get married first, announce the fact by telegraph or telephone to their parents and mammas, and next start off on a honeymoon automobile trip. Funerals too. The journey from the home of the departed to the cemetery used to be a very slow and solemn affair. To permit the horses to go faster than a walk was disrespectful to the dead. A funeral wasn't a real funeral if it didn't spoil an entire day for all concerned. Now a funeral, like most honeymoons, is largely an automobile trip. Selah.

WILL REMAIN HERE

The British harvesters brought in to the west by the C.P.R. to assist in garnering the big crop of wheat, no doubt prevented a grave shortage of men and enabled our farmers to harvest their crop at a fairly reasonable wage rate. Meanwhile efforts will be made to keep these men in the country. It is said that all industries in Canada are showing unmistakable signs of improvement and many skilled and unskilled men will be required. The lumbering industry is due for its busiest winter for many years, and officials of the employment service of Canada say that 15,000 men will be needed. Harvesters are advised to stick to the farm as long as they can until winter sets in.

Three vital sections of the Bank Act passed during the last session of parliament did not go into effect until October 1st and these have to do with the returns made by the banks to the department of finance and with the new penalties for making false or incomplete statements regarding the financial condition of banks. The outstanding change made by these sections, with their related schedules, is that the officers of the bank making the statements must in future take an oath that full provision has been made for bad and doubtful debts in the valuation of current loans and discounts.

It is interesting to note that P. Burns gives his endorsement to the Alberta wheat pool. We recall that in the years gone by, Mr. Burns has advised Alberta stockmen against the dumping of cattle on the market at certain periods which has resulted in heavy losses to stock growers. The same applies to wheat. This commodity should be held over the period of depressed prices and sold in the most profitable market.

Some farmers who were always strongly in favor of the wheat pool withdrew their names under a misapprehension and are now asking to be reinstated. They thought that they could not sell their grain until the pool commenced to operate and as they had to sell early they withdrew their names from the pool list.

Last year there was \$500,000,000 worth of trade went to the United States from Canada. Would it not be good business for Great Britain to try and divert some of this enormous trade into British channels? Opening of markets in Canada for British goods awaits only the action of British manufacturers.

Correct this sentence: "I met a man once who owns a car and he admitted that at one time he was so opposed to motor cars that he advocated prohibiting them the use of highways."

Very little grain is being shipped from U.S. ports these days which indicates that American shipping interests are out to boycott Canadian grain intended for export.

Express companies are pressing for another increase in rates. Apparently they are the lineal descendants of the daughters of the horse-leech.

That Arkansas man who got a dog license instead of a marriage probably felt that he was going to lead a dog's life, anyway.

BEGGARS ON HORSEBACK

Indiscriminate charity is not a virtue but a vice. They are beginning to find this out in New York. Men and women ride in their own motor cars and beg. One man who had a good position given him by Secretary of State Hughes gave it up because he could make more money begging. Several beggars taken in charge were found to have thousands of dollars in their pockets and plenty deposited in banks or invested in real estate and Liberty bonds. One man made \$60 an hour at a favorable place at theatre closing time. Another man formed a trust to deal in beggars. He hired the blind, the halt and the lame, who were not beggars at all, paid them \$3 a day, drove them to and from their posts and pocketed the profits. An effort is now being made to stop the traffic in charity. At any rate a clean-up is being effected with a view to eliminate the imposters and exploiters who capitalize the generosity of strangers.

EDITORIAL PARAGRAPHS

(From the Kincardine Review)
France intends to teach Germany that it doesn't pay not to pay.

If it weren't for organizations how on earth would organizers live?

Let us be thankful for one thing anyway—we are not living in the quake zone.

Another way to avoid war would be to insist that diplomats have their noses endorsed.

Coal miners and operators have settled their differences. Winter cannot be so near as we thought.

By a simple grafting process that hardly annual, the coal miners strike threat, has become a biennial.

Wars can be localized if nations remember that their allies of today are likely to be their enemies of tomorrow.

There is no excuse for any man being out of employment. He can always get a job making the rest of us behave ourselves.

A man in Los Angeles has been awarded alimony from his wife. This will be good news for some married men in Utah.

We know a man who is very hard up and yet he has talent enough to compose a song just as foolish as "Yes, we have no bananas today".

Still another way to insure world peace would be to mobilize the world's armaments and place them under the command of Henry Ford.

"Only God can make a tree" sang Joyce Kilmer, but a careless smoker can destroy thousands of trees with a lighted cigar stub or match.

There's been a change of government in Japan since the earthquake. Wonder if an earthquake would make any difference in Nova Scotia.

Business cannot be very good. The largest employer of labor in Canada viz the government, has reduced the hours of labor this month.

Because of the earthquake a moratorium has been proclaimed in Japan for all payments due in September. A small earthquake would come in handy right here.

Burglars stole eight barrels of native wine in Toronto and abandoned them. Public think they must have been disturbed. Probably they were when they found out it was native wine.

We shall have economy in administration just so soon as people decide to vote against any candidate who spends or promises to spend public money unnecessarily in their immediate locality.

ARREST OF BANK OFFICIALS

H. J. Daly, president; R. P. Gough, vice-president; F. Russell and C. Woods, directors, and O. Smith, accountant of the suspended Home Bank of Canada were arrested on Wednesday on charges preferred by federal and provincial authorities. Bail in case of the two former is \$100,000 and the others \$50,000.

Won Canadian Pacific Scholarships

THOS. S. MOFFATT

ALF. J. WISE

The two free scholarships offered annually by the Canadian Pacific Railway have been awarded this year to Thomas Stuart Moffatt, son of a foreman in the Company's British Columbia Coast Service at Victoria, and Alfred J. Wise, son of an employee at Angus who obtained 811 and 782 marks respectively.

The scholarships, covering four years tuition in architecture, chemical, civil, mechanical or electrical engineering at McGill University are offered subject to competitive examination to apprentices and other employees enrolled on the permanent staff of the Company and under twenty-one years of age and to minor sons of employees. Certificates were issued to sixteen possible competitors this year, and of these, eight wrote the examinations, and four passed. Examinations were held at McGill, Montreal, and other centres, and Messrs. Moffatt and Wise who obtained the highest marks were awarded the scholarships. In addition to these scholarships the Canadian Pacific is now offering a scholarship covering four years tuition in the same subjects at l'Ecole Polytechnique of the University of Montreal, and another covering a three years course at l'Ecole des Hautes Etudes Commerciales de Montreal. These scholarships will be awarded annually and will give the same advantages to the French as to the English speaking employees.

E. P. PICNIC

The annual picnic of the Shorthorn Breeders' Association held on the E. P. Ranch last Thursday was a great success from every point of view. During the day the Prince of Wales fraternized with his invited guests in a spirit that called forth admiration from all who were privileged to be there. His fine democratic spirit, his absence of side, his hearty enjoyment of the healthy pleasures of life in the open which the ranch provided, are attributes in his character which call for affection and respect, and he returns to England carrying with him a feeling of loyal friendship of our people which his personality has helped to create.

WAR ON CROWS

The minister of agriculture for the province will declare war on the crow in the near future. The plans are not decided upon but it is said the minister has a death to the crow policy that will shortly be made public. Th crow has done a great deal of damage in the destruction among bird life of the province, particularly living on birds' eggs. This paper has been advocating action for the past year and we are glad to realize that at last action will be taken against the crow.

Mrs. Elizabeth Bailey Price, prominent writer and member of the Canadian Women's Press Club was elected vice-president of the club for Alberta at the recent convention held at Vancouver.

New Lamp Burns 94% Air

Beats Electric or Gas

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94% air and 6% common kerosene (coal oil).

The inventor, J. C. Johnson, 579 McDermot Ave., Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$250 to \$500 per month.

GIVE YOUR RED CROSS A BUSHEL OF GRAIN

IN the midst of your plenty this year, do not forget your Red Cross, which needs your membership and needs your subscription. The annual drive for membership and finance starts this week. Your Red Cross stood ready to help you in your need—now it is your turn.

HERE IS THE PLAN! WILL YOU DO YOUR BIT?

YOU will never miss a few bushels of grain; when you haul your next load to the elevator just tell the elevator man that you wish to donate some grain to the RED CROSS. He will give you a cheque immediately for the cash value of the number of bushels you wish to give. In addition to this he will add five cents per bushel as the donation of the elevator company to the Red Cross. You endorse the cheque payable to The Red Cross and hand it back to him; he will then send it in to PROVINCIAL RED CROSS HEADQUARTERS, and you will receive an acknowledgement in the form of a membership certificate and button direct from us.

It is estimated that if each farmer with $\frac{1}{4}$ section gives 2 bushels, with $\frac{1}{2}$ section gives 5 bushels

THAT, with the cash donations from the towns and cities, the Alberta Division quota of \$55,000 will be reached easily. This plan has the endorsement and recommendation of

The Lieut.-Governor of the Province
The Committee of the Alberta Wheat Pool.
The Alberta Elevator Companies.

YOUR RED CROSS calls upon you again in the name of suffering humanity to give from your plenty for the benefit of those less fortunate. 82 per cent. of all monies collected will be spent on RED CROSS ACTIVITIES IN THE PROVINCE OF ALBERTA, such as rural hospitals, nursing service, etc. 18 per cent. will be Alberta's share for Japanese Disaster Relief.

DO YOUR BIT and DO IT NOW

THE REAL MOTIVE

Reason of Prince of Wales' Visit to
High River Ranch is Furnished
By Editor of Collyer's
Weekly

That the real motive behind the American visit of the Prince of Wales is to encourage immigration from England to Canada, thus relieving the old country of her surplus population while increasing the stock of Anglo-Saxon blood on the American continent is the surmise advanced by Bert E. Collyer, publisher and gentleman sportsman, recently returned from a protracted visit in the dominion. Writing editorially in his own newspapers, Collyer's Eye and The Reference, Mr. Collyer says:

"Behind the sojourn on a ranch at High River, Alberta, Canada, of the future king of Great Britain is doubtless a political motive of the greatest importance to the English speaking peoples on both sides of the big water. At the root is England's teeming population, always even in normal times excessive in comparison with acreage and power of self-support without outside supplies, but at the present time, with England's foreign trade seriously disarranged by unsatisfactory credits and chaotic conditions on the continent, actually distressing. Confronted with the problem of obtaining relief from surplus population, England has turned hopefully to her territory in North America. During the August harvesting in Canada herculean efforts were made to induce workers to ship from England with the hope that many, finding the gardens of their dreams in the new world, would remain as permanent settlers. Successful in part, at least, this movement did not go sufficiently far to effect the complete remedy that is necessary. Now comes the Prince of Wales as 'Lord Renfrew', travelling incognito, as did his beloved grand-dad, the late King Edward, years ago, and settles down at Edward Prince ranch at High River, Alberta, for a long stay. The Englishmen, at home, reading of the keen enjoyment that the prince finds in the healthy climate and wholesome environment of Canada is quite likely to reason that what is good for the future king of England must certainly be good enough for the commoner. Thus the movement from crowded England to the broad spaces of the Dominion may set in with a vim and vigor impossible to have achieved by any less pretentious means. In aiding and abetting this policy—if our surmise be correct and this is the real motive for the present princely visit—'Lord Renfrew' is indeed rendering a genuine service not only to Great Britain but to the cause of civilization itself. Certainly the transplanting in goodly quantities, of the Anglo-Saxon blood of old England on the American continent will bring incalculable benefits to this side of the Atlantic while, by relieving the other side of its surplus peoples, will make for a more wholesome development of the lives of those that remain. But, whatever the motive, we are sincerely glad that Lord Renfrew is with us. No member of royalty has so captured the heart of America since the days of his grandfather's youth.

The population of Detroit is 1,091,342.

A party of midwest Americans are buying land in the west these days.

In the Manitoba stocker and feeder show held in Winnipeg last week, a car load of steers shipped from Oyen got championship for the best carload of steers, and championship for the best carload of two years and under steers and a special prize for the best hereof. A Monitor farmer got first for the best lot of purebred or grade, one year old and under two.

DOMINION LOAN

Advance Subscriptions Aggregate
Than \$72,000,000—Syndicate
Launches Campaign

The new Dominion government refunding loan which is being offered to the public gives evidence of a very marked popularity. Although the preliminary announcement was only made on Thursday morning by the Minister of Finance, advance subscriptions aggregating well over \$72,000,000 (or over forty per cent. of the entire objective of \$172,000,000) had been received by the selling syndicate at the close of business on Saturday. This leaves, in round figures, one hundred million dollars still available for subscription.

This heavy preliminary subscription is the more remarkable, as only two of the big special subscriptions which bulked so large in the Victory loans have been received and are included in this total. Others are pending confirmation at directors' meetings.

Cash subscriptions to date present a striking contrast to the situation which existed when the government offered its renewal loan last year to holders of 1922 Victory bonds. That offer lasted for well over two months, during which period the total of subscriptions was only \$110,000,000. In the two days preceding the present offering cash subscriptions, in excess of \$72,000,000 have been received, which is two-thirds of the entire amount taken up during last year's conversion loan. Practically every dollar of the subscriptions taken into account to date represents entirely new money.

Buyers of the new bonds are being given their choice of a long or a short maturity. The former is of twenty years' duration offered at 98.25 and interest at which price it will yield the investor 5.14 per cent. Those who prefer securities with approximately the same life as the average first mortgage can buy a five-year bond at 99, which will return 5.23 per cent. on the investment. Present indications are that the twenty-year bond will be the more popular, as it was referred to by the head of one of the biggest financial institutions as "the soundest and sweetest bond ever offered the Canadian people."

The new issue is being offered at prices which give a materially higher interest return than similar obligations of the United States and Great Britain. Among the United States issues, the average interests return on eight of that nation's bonds is only 4½ per cent. The United States' third Liberty 4½ per cent. issue, which matures within two months of the new Canadian five-year bond, yields only 4.52 per cent. against 5.23 per cent. for the Canadian bond. In Great Britain the average yield on four War Loan issues is only 4½ per cent.

In view of the materially higher yields of the new Dominion bonds and their absolute security, outside interest has been aroused already in the issue. Particular emphasis is laid in financial circles on the Metropolitan Life Insurance Company's subscription. This company is already one of the world's largest individual holders of Canadian securities. Although it is a New York concern, its heavy investment in the new issue, after closest scrutiny, presages a further demand from across the border.

Up to the moment Honorable Mr. Fielding made his announcement, United States bond houses were of the opinion that he would have to enter the New York market at that market's terms. Now that the offering is being made in Canada to Canadians several of these houses are ready to purchase the new Canadian payment bonds on the same basis as is offered to the Canadian purchaser.

By selling these bonds in the home market, the Minister of Finance, in addition to giving Canadians the first chance to buy a bond of unexcelled security and unusually high interest rate, also effects a very substantial saving for Canada. At the prevailing rate of exchange, this saving of interest payments alone will be approximately \$200,000 each year. Furthermore, subscribers have the satisfaction of knowing that their money is staying at home and working in Canada for the benefit of the Canadian people.

SHOW AND SALE

Breeders who have Feeders and Stockers for Sale Should take Advantage of Calgary Sale

The first annual Alberta stocker and feeder show and sale will be held in the Calgary stock yards from October 9th to 12th, 1923, when \$6,000.00 will be offered in prize money. Alberta cattle won the major premiums at Winnipeg show and sale last week and the average cattle sold at a considerable premium over the regular market. The best car load brought \$7.25 per hundred. The sale was brisk throughout with the offerings being short of satisfying the buying demand. Any one with stockers or feeders to sell would be well advised to get in touch with any commission firm or with the manager at the stock yards. Live stock for the show and sale must arrive at the stock yards not later than noon, October 9th, 1923.

Eighty per cent of British harvesters who came to Saskatoon will remain in Canada.

INSPECT REAPER

Killam Farmer has Completed Great
Machine which does Away with
Binding and Stooking

Members and officials of the provincial government headed by Hon. Geo. Hoadley, minister of agriculture, paid a visit to the farm of J. H. Hauser of Killam, this week, where Mr. Hauser is perfecting a combination of inventions to harvest grain without the necessity of binding or stooking. Mr. Hauser has successfully established a method of reaping grain without use of binder, twine or stookers. He uses an ordinary push binder with a 12-foot swath, cutting to a five or six inch stubble and laying the grain in winrows on this stubble. An extension attachment to the machine is dropped on the second round of the field to the level of the machine table thus running the grain from the second round out 24 feet laying it on top of the first winrow. The grain dries perfectly by lying on top of the stubble. In threshing Mr. Hauser has been using a loader. By a patent arrangement the grain is unloaded from the loader at the separator in neat stacks. Mr. Hauser's plan is to perfect a combination of the loader and thresher. So interested is the government in Mr. Hauser's efforts to perfect his ideas and solve to a great extent the problem of harvest labor, that it is considering steps to assist him, and procure the full benefit of his operations for the farmers of the province.

RURAL EDUCATION

Correspondence Course for those who
Live in Remote Rural Districts
Will be Conducted by
Government

A system of education by mail for those who live in remote rural districts out of reach of rural schools is being prepared by Hon. Perren Baker, minister of education, to go into effect October 1st. The working plan has already been drawn up to run through the winter to the end of the school year. It is expected that from twenty to forty lessons will be given in the case of each applicant for the service, and the work will be carried on under the direction and supervision of the department. Correspondence courses will be conducted by the department up to Grade VIII. Outline lessons will be furnished for the use of children up to that grade, instruction being given by their mothers. Assistance will be given to parents undertaking this work, and the general run of the lessons will be furnished free of cost, and in respect to other text books the correspondence pupils will be on precisely the same footing as those in organized school districts. The new service is not intended for those within reach of schools but will be limited strictly to families beyond the pale of other educational facilities. Mr. Baker says that the cost of the service will be only trifling. For the first year, it is expected, the present staff at departmental offices will be able to take care of the work, and only additional cost will be postage stamps and supplies. The service given to the people on the frontier, however will be of great value and benefit.

RED CROSS FUNDS

Appeal for Funds Being made in
half of the Red Cross.—Do
Your Bit

The Red Cross campaign for funds starts off this week with an appeal to all farmers who are grain growers for a donation of grain. This will be counted as membership subscription to the society and of the monies raised 82 per cent will be spent in our own Province and 18 per cent given for Japanese relief. In Alberta there is no service given by the Red Cross which makes a more direct appeal than the rural hospital and nursing service. It is of incalculable value to the settlers in outlying districts. In those parts of the province where the government has not been able to establish nursing service, the Red Cross has operated seven rural hospitals, or nursing outposts, and has maintained district nurses in some communities far removed from hospital service. One hospital in the far north is situated one hundred miles from steel. Without the Red Cross there would be no provision for the care of the sick and much suffering and hardship would be endured by the settlers. Some features of this work are as follows: Seven Red Cross hospitals have been established and operated. One hundred and seventy eight babies have been born in Red Cross institutions. Fifteen Aid classes have been held, and health lectures have been given. Pre-natal, Child Welfare and other visits have been made to homes in the hospital districts. To continue and develop this work is the future policy of the Red Cross. On these worthy grounds the society appeals to everyone to support the forthcoming Annual Campaign and Membership Drive, to raise funds for Red Cross Service.

Lloyd George was given a great "send-off" upon the eve of his departure for a tour of Canada and the United States. The U.S. ambassador at London in speaking of Lloyd George pronounced him to be one of the most remarkable personalities of his own time. His greatest service to Britain was rendered as director of munitions during the war.

Health is Wealth

Isn't it true? We all know at least one person who is not enjoying perfect health, and that person is not enjoying life, even though their every day environment and financial condition are all that could be hoped for.

Chiropractic Adjustments

afford wealth to the sick and afflicted by restoring them to normal health again. It costs you nothing to learn how this wealth may be obtained.

Stimulate Your Skin

The skin with its network of tiny pores and glands should never be allowed to become sluggish and inactive. Dirt, cold cream, rouge and powder will clog the pores, enlarge them and produce blackheads and blemishes unless the skin is cleansed thoroughly with soap and water at least once every day.

This simple method of beautifying was Cleopatra's secret. She knew that to have a fresh fine skin thorough cleansing was necessary. She used Palm and Olive oils, the same rare oils which are blended in Palmolive.

If you use a fine mild soap, there is no danger of irritation. Palmolive with its creamy lather, is lotion-like in its action. It freshens, revives and stimulates and leaves the skin delightfully fresh and rosy.

You can buy Palmolive Soap at all first-class dealers.

REID HILL NEWS

Miss O.V. Haw, who has been teaching at Sunny Glen school since the New Year, has terminated her engagement and has gone to Edmonton to continue her studies at the University.

Reid Hill and Sunny Glen schools were well represented in the school fair exhibits and the competitors are to be congratulated on their efforts in the various exhibits submitted.

Miss M. Harber has been secured to teach the Sunny Glen school and commenced last October.

BRANT NEWS

Mr. and Mrs. Don MacLaren were week-end visitors at Calgary.

Miss Grace Cascarden spent the week end with home folks in High River.

Services were conducted by the Rev. Father Bowlen in the Catholic church at Brant on Sunday, Sept. 30.

Mrs. John Eversman, who has been residing in Calgary for the past few weeks, is visiting with Mrs. Doug. Holmes.

Mr. and Mrs. O. F. Malmberg and family of High River were Brant visitors Sunday, the guests of Mr. and Mrs. L. J. St. Clair and family.

A 60 bushel an acre yield of Red Bobs wheat on a 45 acre field belonging to Isaac Jacobson, of near Vulcan, is reported. This yield comes very close to "Dad" Fletcher's yield of 61½ bushels per acre on 188 acres.

A number of people from Brant attended the services in the Blackie auditorium, conducted by the Rev. Mr. Wood of the Christian orphans' home at Olds. After the services the Elliot family orchestra rendered an hour of sacred music.

Mr. MacLeod, former manager of the Bank of Hamilton here, has been transferred to Champion, where he has a position as accountant. Another Mr. MacLeod has taken his place as manager of the Bank here.

A large number of people attended the musical concert, put on by the Elliot family orchestra in the Brant hall Saturday night, Sept. 29. A number of very beautiful selections were played by the orchestra, which were fully enjoyed by the crowd in attendance. After the concert they held a dance which was also enjoyed by quite a number, until midnight.

Mr. Abraham has resigned his position as manager of the Home Grain elevator, and Mr. Ed. Donnelly, who managed the elevator a year ago, but who went to Brandon and went in the motor business, has returned and will once again take up his former duties with the elevator. Mrs. Donnelly and young daughter Mildred, it is understood, will be back here in the near future.

THE C.P.R.

The visit of President Beatty of the C.P.R. to the west is very timely and he has seen the country at its best. He came at a time when the rich harvest of grain was being threshed and garnered and there is no doubt that he was influenced by what he saw and the year 1924 will witness expansion on the part of the C.P.R. and a better service to the people. The tour undertaken by Mr. Beatty and the manner in which he has met and consulted with members of boards of trade indicates that the C.P.R. represented by him is anxious to keep in touch with the public and that it is an institution which is willing to listen to the public and give consideration to what are considered public needs in its policies. This is fine attitude as it does away with the thought of autocratic aloofness which is so frequently charged against powerful corporations.

We shall have economy in administration just so soon as people decide to vote against any candidate who spends or promises to spend public money unnecessarily in their immediate locality.

ITEMS OF INTEREST

The weather during the past week has been ideal for threshing and stooking. It is a long time since we have enjoyed such wonderful weather.

On Friday last Constable Holton made a search of the City Cafe, Brant, under the Liquor Act and found a quantity of liquor hidden in the chicken coop, covered with straw. Sam Wing, the proprietor, was arrested and taken before H. H. Wilson, J.P., at Blackie, who remanded him until Monday, October 1st on a \$200 cash bail. He appeared before Mr. Wilson on Monday and pleaded guilty to a violation of the Liquor Act and was fined \$200 and costs. The fine was paid. Constable Holton prosecuted.

It has come to our attention that the officials in charge of the employment bureau at Calgary are responsible for the increased rates being demanded by some harvesters. One official was heard to advise harvesters to hold out for bigger wages recently. In view of prevailing prices obtained for grain, \$5 per day for stooking is too high and \$6.00 altogether too much for threshing. That official should be dismissed at once.

Ignoring the dangerous explosive qualities of gasoline, Henry Leback of Champion, employed on J. Hutchinson's threshing outfit, suffered severe and painful burns and face and hands on Tuesday night when he attempted to pour gasoline into an automobile, whilst a companion held a lantern to lighten the darkness. An explosion followed and before Leback could protect himself the damage was done. It is indeed fortunate the injuries are as slight as they are, and the incident serves to illustrate once more the danger of fooling with gasoline with a lighted lantern.

The season for shooting Hungarian partridge opened up on October 1st and the reports from sportsmen is that this game is very scarce, the coveys being very much smaller than last year and shooting very difficult as the birds spread out to prevent annihilation. In the hauled out districts very few birds are to be seen, which would indicate the hail killed many of the young birds. It is thought the heavy rains that occurred during hatching season was responsible for much loss in bird life and those that escaped the floods were destroyed by crows and magpies. The prairie chicken season will open on October 15th.

Several of the neighboring ranchers accompanied Lord Renfrew on Saturday morning in the exciting sport of coyote hunting on the E.P. Several excellent coyote hounds were obtained and the royal party had a lively ride after the wily coyote and succeeded in capturing three of the pests. In all about fourteen coyotes were brought out from cover but the balance managed to escape from both guns and dogs. The day was all that could be desired. A warm Alberta sun, a clear sky and an invigorating wind blowing added zest to the occasion and the party returned in high spirits to their noon-time dinner. His lordship took advantage of every hour of his stay upon his ranch to get the best out of it in open air exercise and it was with the greatest regret he broke away on Sunday from his Alberta ranch. He will not have the same freedom of action during his stay in the east, and we know he would have preferred to live the simple life on the ranch where he was surrounded by his entourage and in an environment that was to his liking.

COAL INDUSTRY

Strict regulations for the protection of the Alberta coal industry and for the prevention of wildcatting in coal companies which has developed in Ontario in connection with the campaign to put Alberta coal on the market, have been passed during the past week by the Alberta government. These regulations are aimed chiefly at the wildcatting which has been going on in Ontario by irresponsible people presumably owners of Alberta coal properties shipping coal. They, however, have general regard to the protection of the industry at large. The regulations provide for the shipping and selling of coal under duly registered names. Information respecting the name of the shipping company, the registered name of the coal, the grade and date of shipment must be placed on every shipping bill and be displayed on the car doors. The same applies to the keeping of records of sale of coal from each mine in the province and also applies to the advertising of such coal, so far as the registered name of the coal is concerned. The regulations provide for the appointment of inspectors who have power to inspect any shipment or quantity of coal sold, to ascertain whether it conforms to the information given. Infraction of these regulations is punishable by a fine not exceeding \$1000 or imprisonment not exceeding six months, or both. The Ontario government has taken steps to supervise the shipment to Ontario points of coal from Alberta under the special rate of \$7 ton given by the C.N.R. up to October 31. Those Ontario purchasers arranging for coal under this special rate must forward their names together with the names of the firms from which they are purchasing in Alberta, to the fuel controller. This list will then be forwarded to the trade commissioner of Alberta who is asked to pass upon the capacity of the firms concerned to supply the coal. The Ontario government has already received applications for more than the 10,000 tons granted the special rate by the C.N.R.

BEAUTIFY RANCH

Parks Superintendent W. R. Reader spent the afternoon of Saturday at the E. P. ranch to consult with Lord Renfrew between his intervals of coyote hunting and loading hay, as to plans for the improvement and planting of the grounds attached to the ranch house, says the Calgary Herald. While the prince is desirous of beautifying these grounds, he also wishes to keep them simple so as to be in keeping with the true character of a ranch. He was most anxious that nothing should be planted that would in any way interrupt the view of the mountains and foothills to the west and south. The scheme that was finally decided upon included a boundary border to be planted, extensively with low growing flowering shrubs and old-fashioned hardy flowers, a rectangular arrangement of paths and flower beds, directly in front of the building, a heavy heavy planting of trees and shrubbery along the creek side to form a woodland walk, a simple rock garden, and a large kitchen garden, the paths of which are to be bordered with hardy perennials. Superintendent Reader is to prepare a plan in duplicate, one copy of which will be sent to England to His Royal Highness. As a first step towards the planting of the grounds and to commemorate his visit, Lord Renfrew planted a tree on Saturday evening, as did also Brigadier Trotter, Sir Godfrey Thomas, Major Metcalfe and Mr. Peacock. These trees were shipped out from the city nurseries for this purpose.

Cabinet ministers of the P.E.I. government were returned by acclamation on September 28.

Figures showing the turnover of the B. C. government's liquor business during the past six months will be compiled for the opening of the legislature. Early estimates by liquor board officials place the total business of liquor stores throughout the province at \$1,000,000 a month or more.

Logging operations will be brisk in the north this year, one company, the Northwest Lumber Company, laying plans to cut 30 million feet. They cut 16 million feet this year. This company operates at Edmonton one of the most modern lumber mills in Canada.

YOU KNOW

THAT we, in Alberta, have never had prohibition.

YOU KNOW

THAT in your own community the Liquor Act of Alberta has been constantly violated. Multiply this by the number of communities in Alberta and you will have figured out the result for yourself.

YOU KNOW

THAT bootlegging is rampant in Alberta, prevalent in B. C. and has almost disappeared from Quebec.

YOU KNOW

THAT by the approval of Clause "D" the Government of Alberta can adopt and combine the best points of the B. C. and Quebec systems to the advantage of our Province.

YOU KNOW

THAT B. C. distributes \$2,500,000, and Quebec \$5,000,000 in the support of roads, schools, hospitals, etc., from the profits of the first year of operation. We have given ours to the bootlegger.

Don't Let Prejudice Control Reason

MODERATION LEAGUE OF ALBERTA

MORTGAGE SALE
